2008-09 Dodge Challenger Dual Hood Stripe

ALWAYS READ DECAL INSTALLATION SHEET PROVIDED.

◀ Remove washer jets and clean hood thoroughly.

▶ After hood is clean (SEE APPLICATION INSTRUCTIONS SHEET)
 Lay out center tape with edge of tape on the centerline of
 hood at front and at windshield.
 Be accurate so nose stripe will align properly.

◀ Trim excess top application tape for an easier install.

◀ Trim center badge section top application tape.
 You can install this piece first so the hood stripes will align
 but make sure the stripes are dry fit to check alignment first.
SEE BOTTOM OF PAGE.

▶ Triangle edge will butt to the center line tape that you installed.
 Squeegee completely and install second stripe.

▶ Triangle edge on the second stripe will butt to triangle from
 the first stripe creating the correct center space.
 Wrap hood stripes at nose under hood and finish.

◀ Install nose piece being careful of emblem spacing and stripe
 alignment. After it is squeegeed to nose trim just enough extra
 material to finish in the seam behind rubber seal.
**If you have too much material it will not slide behind the seal at the
 fasteners.**
