2008-09 Dodge Challenger Upper Fader Stripe

ALWAYS READ DECAL INSTALLATION SHEET PROVIDED.

◀ Prepare the stripe by cutting out the mirror and door handle areas.
Identify all sections and their correct placement.

▶ Because the door has the door handle and mirror install the door stripe first.

After the stripe is installed you will need to remove the application tape and wrap the stripe into the door seams and trim excess stripe before installing any other body stripe or the stripe will get in your way.

◀ Install fender pieces and so on.
Make sure to trim and wrap into door seams.

The rubber gasket between the fender and door can be a problem, so trim the extra stripe so you have only enough to finish to the gasket. Make sure to allow the stripe time to dry thoroughly so gaskets do not move or buckle the stripe.
